

Twister[®]

SYNTHETIC PINS

TOMORROW'S PIN... HERE TODAY

Twister® Pins

Over thirty years of specialist German engineering has resulted in the development of the Twister – the first mass-produced synthetic bowling pin to obtain ABC/WIBC and USBC approval for use in sanctioned competition. First hitting the market in the summer of 1999, the Twister has enjoyed much success as a cost-effective replacement for wood pins as proprietors around the world are making the switch to the durable Twister.

Twister® is a registered trademark licensed to of the Arnold Jäger Holding GmbH.

Compare THE COST PER LINE

When shopping for bowling pins, the overall pin cost per line is a true indicator of which pin represents the best value for a Bowling Center. The overall cost per line of the Twister is less than any other pin on the market. Add to that its consistent scoring, and the Twister is by far the best value for any Bowling Center.

Longer Life — LESS MAINTENANCE

With its extreme durability, the Twister has a much longer life than conventional wood pins. And, since it doesn't compact or compress like wood, there is no need to "rest" or rotate the Twister or worry about moisture content. Twister won't need to be replaced as often, and additional rotation sets won't need to be purchased. All of this adds up to big savings on your bottom line!

Highest NECK STRENGTH

The neck area of the Twister is extremely strong. It exceeds the dynamic break resistance of wood pins by far.

One of the BEST WARRANTIES

With one of the best warranties in the industry, you can have peace of mind knowing that your Twisters are guaranteed longer than most wood pins on the market. Ask your local Bowltech branch for details.

Glows under BLACK LIGHTING

Along with the white body of the Twister, the red stripes glow under the appropriate black lighting and work with all automatic scoring systems. Twister is the only pin with glow-stripes in “true red”.

Quickly GAINING IN POPULARITY

Ever since its introduction to the bowling marketplace, the acceptance and popularity of the Twister pin has steadily grown. Proprietors worldwide are viewing the Twister as the “pin of the future” and are realizing the many benefits the Twister has to offer. In addition, many prestigious bowling events have selected the Twister as their pin of choice.

Consistent SCORABILITY

Since its shape hardly changes while in play, the Twister retains its original properties during its life. The result? The flight of Twister pins remains consistent and true, even after thousands and thousands of lines of use. This means scoring levels remain the same and bowlers can expect the same pin action from day one!

NO PIN SLIDE & PINS CLEANER | PIN CLEAN MACHINES

NPS (No Pin Slide) creates a textured surface which helps the pins grip and fall down rather than slide out of range. Apply it to the pin deck and the problem is solved.

Physical Properties:

Weight per container	2.25 lbs.
Shipping Weight	10 lbs.
Packaging	1 gallon per canister Concentrated
Part Number	K-99C
